✓ **Directions (Q. Nos. 51 to 55)** Read the following passage to answer the questions given below :

The trend of corporate universities is on the rise. In 1993, corporate universities existed in only 400 companies. By 2001, this number had increased to 2,000, including Walt Disney, Boeing, and Motorola. According to BCG, there are estimated to be more than 4,000 companies with formal corporate universities.

Scale : McDonalds serves 68 million customers daily in 119 countries across 35,000 outlets. This complexity requires training. That ensures that McDonalds burgers taste the same from Mumbai to Moscow.

Complexity : When surgeons move to the operating theater they rely on checklists. These lists reduce human error, and help the surgeon to operate with speed without having to stop and double check if they are missing any step. In performing complex

tasks through collaborating teams, speed comes through training in standard processes and procedures. Apple University teaches employees that they're at the company to be the very best at one specific task.

Corporate Governance : Governance needs the ability to manage reporting relationships, finances, and facilities. Compliance and risk management demand investments in training. On any given day two billion people use Unilever products across countries that have different rules and regulations. This scale and complexity demands constant investment to ensure standards are not compromised.

Education : Entry-level hires are drawn from a wide variety of educational backgrounds. There is a need to bring people to a common minimum level of knowledge and skills. From technical skills or domain knowledge or personal competencies, people need to keep upgrading.

Values and Culture : The leaders need to be role models of the values the company proclaims. When the majority of employee responses to everyday situations become uniform, it forms the culture of the organization. Tying the professional development to strategic challenges is a strong reason to invest in training.

The culture of the organization has to support its vision and strategy. This needs a place when people can come together and connect with others and learn. Technical training can be delivered through e-learning modules. It is the intangibles like culture that people need to learn from role models.
